

Ladder Safety

Laddermate™ is a unique ladder safety product specifically designed to stabilize a straight or extension ladder when used on a utility pole (or other cylindrical object such as a light pole, piling, I-beam post, etc.). When properly used, Laddermate™ effectively eliminates the destabilizing "twisting" motion most responsible for ladder-on-pole mishaps. Because Laddermate™ is so quick and easy to use, it makes elaborate, time-consuming rope lash methods obsolete.

The first telephone operating companies to fully implement Laddermate™ over ten years ago found that ladder related accidents dropped **sixty percent!**

Laddermate™

- Meets OSHA requirements for ladder safety.
- Independent laboratory tested.
- Specially woven military specification canvas material with mildew inhibitors and wear indicator thread embedded in the webbing.
- Reliable military specification hardware.
- LM100 - Laddermate™ Bottom Strap

Laddermate™ Top Strap

- Meets OSHA requirements for ladder safety.
- Independent laboratory tested.
- Special red nylon webbing material
- Reliable military specification hardware.
- LM200 - Laddermate™ Top Strap

Laddermate™ Top Strap (LM200) provides an extra level of safety and stability when used with the LM100. The LM200 quickly secures the top of the ladder to a pole or strand.

Laddermate™ Bag

- Heavy duty yellow mesh.
- Zipper closure.
- Use with LM100 and LM200.
- **LMB** - Bag only
- **LMBH** - Bag w/hook

Ladder Leveling Wedge

- Durable hardwood construction.
- Hardened steel feet provide non-slip, level footing on uneven terrain.
- **8889** - Ladder Wedge
