

820 and 804
Extension Sections

Fiberglass Pruner Sections

Heavy duty fiberglass tubing make these handles the strongest, lightest, and most durable professional pruner handles available. Fiberglass affords many times the service life of wood handles, making them the best value for the professional user. The seamless aluminum ferrules mate with all standard attachments and can be used together with standard 1¼" diameter wood handles. Special surface treatment prevents "blooming" of glass fibers if dented. Safety yellow color.

- **820** - Fiberglass Extension Section - 1¼" x 6'
- **830** - Fiberglass Extension Section - 1¼" x 3'

Wood Pruner Sections

Octagon shaped wood handles are fitted with interlocking seamless aluminum ferrules. Handles are provided in various lengths and configurations to fit virtually any task. Both extension sections and handles are 1¼" diameter and mate with fiberglass sections. Long handles are one piece with one end tapered for head. Many accessories available.

- **802A** - Head Section - 1¼" x 2'
- **802B** - 802 Head section w/ 812A Saw
- **803A** - Head Section - 1¼" x 6'
