New Stop/Slow Handle!!

Our new stop/slow handle is designed for durability and ease of use. Heavy duty ABS plastic tube and socket connectors with locking spring buttons make deployment and take-down a snap. Handles feature flat facets front and back which aid the user in determining the sign's orientation, minimizing the amount of time their attention is away from traffic. A thick rounded bottom cap protects the handle from wear while making the unit easy to rotate.

Handle comes standard with our roll-up stop/slow kits and will be available in mid- 2009 for rigid models.
