

Emergency Traffic Control - Fire Service

FOLD & ROLL™ SIGN SYSTEM

EMERGENCY TRAFFIC CONTROL
FIRE SERVICE

Emergency personnel face not only the hazard at the situation they are attempting to suppress but they are also facing dangers related to motorists driving through or near an emergency scene. Advanced warning signs alert motorists of hazardous conditions ahead and create a higher level of awareness. Proper training in the use and deployment of signage is essential.

Shown here: **DF3003S** sign stand and **3000XP48** sign panel

36" Sign System

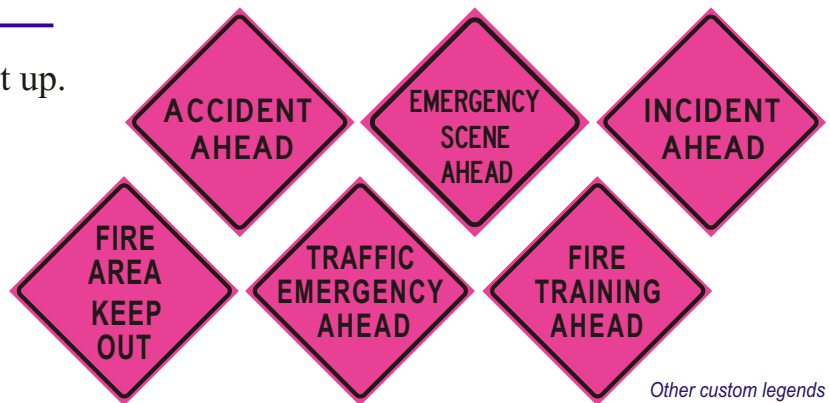

USE: _____

- ▶ Advanced warning signs should be deployed at all emergency scenes to advise motorists that emergency response units are working on or near the roadway. These items should be deployed at a predetermined distance from the apparatus in a manner that does not create additional hazards. Department policy will dictate safety procedures to be in place for deploying these items.
- ▶ Compact sign systems such as the Fold & Roll should be stored in an area that is readily available based on Department procedure. The Fold & Roll system will store easily in most midship and side compartments making them accessible to the driver/operator or firefighter assigned to those duties.

FEATURES: _____

- ▶ Compact storage configuration and easy set up.
- ▶ Utilizes kick release mechanism for quick leg deployment.
- ▶ Available in many different sign legends.
- ▶ Aluminum and steel construction.
- ▶ Displays 36" sign (7" x 8" x 36" stored) or 48" sign (7' x 8" x 45" stored).

Standard Legends

Other custom legends and overlays available on request
